NiceLabel DESIGNER PRO

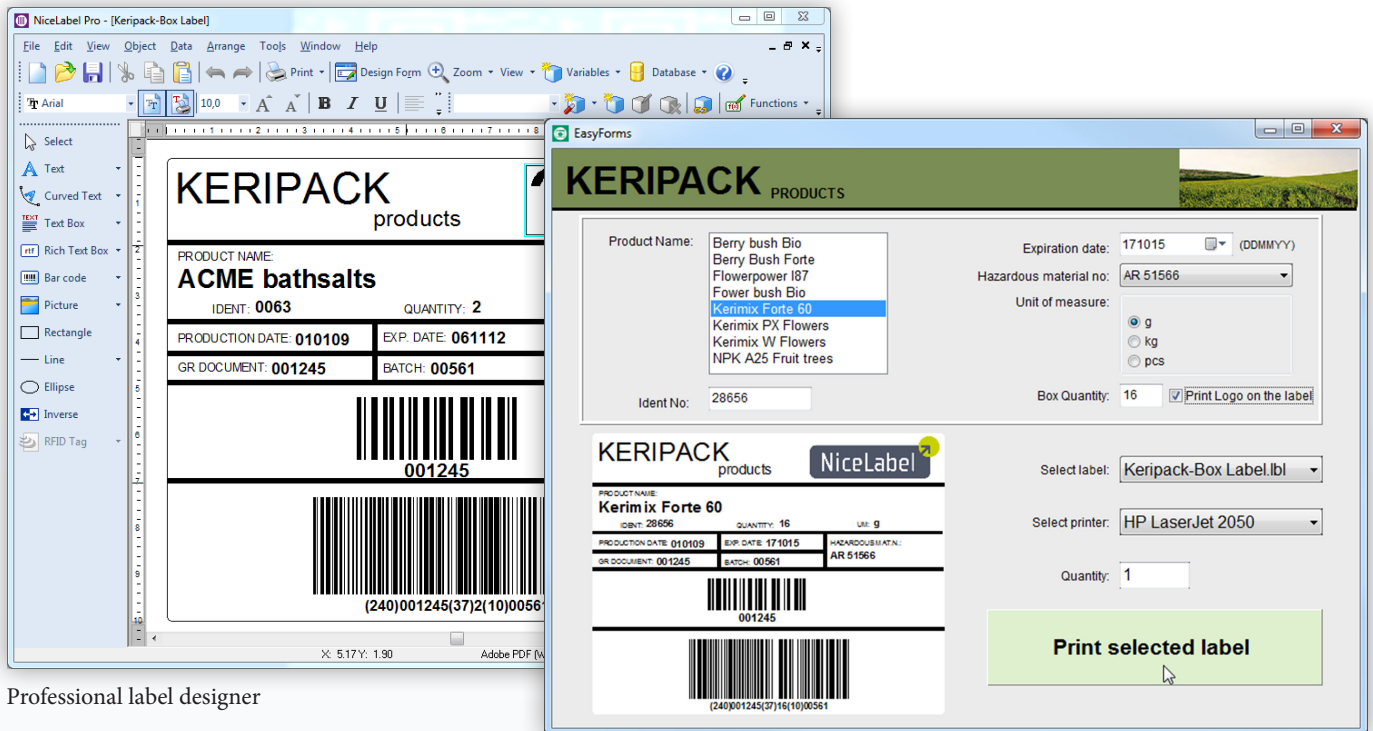

The most powerful designer now with
EasyFormsTM

The Full Spectrum of Labeling Software

NiceLabel 

Professional labeling for industry

The most powerful designer now with EasyForms™

Professional label designer

EasyForms printing program

Benefits

Easily create complex variables

Variable label data can come from as many sources as you need. Full serialization, including non-decimal serial numbers, custom barcode check digits, global variables, output masks, date/time arithmetic and scripting help you easily create complex variables.

EasyForms gives you simple error-free printing

EasyForms give your operator simple label printing, all **within one form**. This reduces data-entry errors, label misprints and duplicate serial numbers associated with printing from multiple dialogue boxes or label design programs.

Every feature you need for compliance labeling

The designer includes all the layout and data tools you need to design labels allowing easy compliance with industry standards.

Work with large databases

Store formats, True-Type fonts and graphics in your printer's flash memory and achieve faster printing of the first-label-out.
